EXPERIENCE

Regional SOP Performance & Demand Intern – Danone

Dec 2024 – Jun 2025

- Managed ETL workflows and analyzed sell-in, sell-out, and stock data to support AMEA supply chain planning.
- Built automated dashboards and metrics using Power BI, Power Query, and Power Automate, boosting reporting efficiency by 100%.
- Improved BI dashboard performance by 70% through optimized DAX and data models.
- Developed demand forecasting time-series models that improved accuracy by 20% using historical sales data.
- Created Python scripts to automate ETL, enhancing data processing speed and error handling.
- Collaborated with global teams to align BI tools with regional business needs.
- Ensured data quality by maintaining and troubleshooting data pipelines.

Graduate Teaching Assistant – Singapore Management University

Aug 2024 – Dec 2024

Graduate Teaching Assistant for IS630- Statistical Thinking for Data Science.

- Facilitated student understanding of coding and statistical concepts to enhance their ability to draw insights.
- Supported the professor by promptly addressing and resolving student inquiries.
- Monitored student engagement throughout the term, fostering an active and collaborative learning environment.

NOTABLE ACADEMIC PROJECTS

LUXASIA (Esentials) Research & Analysis

- Built a product recommendation system using collaborative filtering on 100K+ transactions, improving precision by 20%.
- Performed RFM-based customer segmentation to drive targeted marketing strategies.
- Applied Market Basket Analysis to uncover frequent itemsets and inform cross-sell/growth initiatives.
- Developed a churn prediction model (90%+ accuracy) using Random Forest to enhance retention planning.
- Presented strategic insights and data-driven recommendations to senior stakeholders.

Hotel Reviews Analysis (Natural Language Processing, LLMs)

- Processed and cleaned 100K+ TripAdvisor reviews, reducing data size by 15% to improve model efficiency.
- Built a custom VADER sentiment model (85% accuracy) to identify top 10 customer pain points.
- Compared performance with RoBERTa (Hugging Face), observing a 2% drop in F1 score.
- Applied LDA topic modeling to uncover key themes across sentiment segments.
- Developed an interactive app for context-aware sentiment analysis from user input.
